DEAR BUSINESS PARTNERS,

For the year 2025, we have successfully achieved our main goals and significantly increased our production capacities in the clothing sector. This means an even more stable and reliable supply of products, especially our Combat Garments, the availability of which we have massively expanded. At the same time, we are working intensively to implement these improvements in our equipment department and weapon technology as well.

Through targeted optimizations of our supply chains, we have also managed to reduce the prices of several essential products. This allows us to offer you our proven quality at even better conditions, without compromising on performance or reliability.

Furthermore, we are pleased to present a wide range of new products in **CLAWGEAR Garment & Equipment**, developed with the utmost precision and based on your valuable feedback.

Our products in the field of weapon technology are exclusively manufactured by the **CLAWGEAR ARMS** business unit. Our mission is to equip you with the right tools and solutions to best support your operations. For us, it is not just about products – it is about a commitment to responsibility, dedication, and partnership.

Discover the latest edition of our CLAWGEAR product overview and look forward to exciting highlights, innovative developments, and a product range that leaves nothing to be desired.

With best regards and great anticipation for a successful year 2025,

Your CLAWGEAR Team

THE CLAWGEAR SALES-NETWORK

CLAWGEAR is known for its high-quality products in the field of tactical equipment and clothing. The distribution network of CLAWGEAR spans various countries and regions to ensure that customers worldwide have access to their innovative and functional products. Close partnerships with specialized retailers and online platforms ensure broad availability. CLAWGEAR places great importance on quality and customer satisfaction, which is also reflected in the selection of their distribution partners.

CLAWGEAR

PRESENTATION

WHAT IS CLAWGEAR?

CLAWGEAR exists to bring innovative solutions that solve problems for our professional users.

By working closely with military, law enforcement, and other security services we strive to understand their specific needs. This means the products we develop begin life with a specific problem to solve.

Our vendors use only the highest quality materials from recognized brands that meet internationally recognized standards for quality and performance. Our in-house development and prototyping create a proof of concept samples that are extensively tested and revised to ensure product integrity. Only when testing has been completed and signed off, is the product released for manufacturing at our specialized factories.

GARMENTS - FUNCTIONAL CLOTHING

In the garments section you will find products, which includes our **battle** dress uniform (BDU) and functional clothing products. These are offered in various colors and prints either as stock items or special make-up projects. For the first time, we are also offering “female fit” as a special make-up on selected BDU styles.

EQUIPMENT - GEAR & ACCESSORIES

In the equipment section, you will find a range of items covering individual “on-the-man” products such as pouches, belts, and other innovative storage options. In this section, we are also several new products for 2025 in the form of ballistic protection carriers. All our equipment products are produced using the highest quality materials. The Clawgear Plate Carrier – Ultimate Mobility and Maximum Flexibility.

QUALITY WITH RESPONSIBILITY – CLAWGEAR

At CLAWGEAR, quality is our top priority. Our responsible quality management ensures that every product meets the highest standards – from development and production to delivery. We carefully oversee every step to guarantee durable, reliable, and precise solutions.

Your satisfaction is our motivation, and responsible processes are our promise. Quality you can trust – that’s what CLAWGEAR stands for.

QUALITY MANAGEMENT ACCORDING TO AQAP2110

For CLAWGEAR products and projects supplied to the North Atlantic Treaty Organization (NATO) or under a NATO contract, the Allied Quality Assurance Publication AQAP-2110 shall provide the requirements for the highest quality standards during the whole development process, and production. We see compliance with these standards as the foundation for the high quality of our products.

GENERAL QUALITY MANAGEMENT ACCORDING TO ISO 9001:2015

Since 2018 all brands within the TMH TRADING GmbH portfolio have followed the Quality Management Systems requirements of ISO 9001:2015. The market segments served by the products provided by the CLAWGEAR brand benefit from ISO9001:2015 registration by ensuring products meet customer, statutory and regulatory requirements. In addition, the quality management system strives to enhance customer satisfaction through effective product feedback and corrective actions. With us, quality is not only monitored, in fact but it is also developed.

PRODUCT DEVELOPMENT

All product development for CLAWGEAR products occurs in Europe from our development centers. New product concepts are conceived, designed, and prototyped within our own product labs. Prototypes are tested for suitability for end use and desired performance before handing over to our production team.

During this period, designs are critiqued against the design intent and if we have the desired or expected output from the product being developed. At the same time, we are working with our supply chain to achieve the required parameters in our materials.

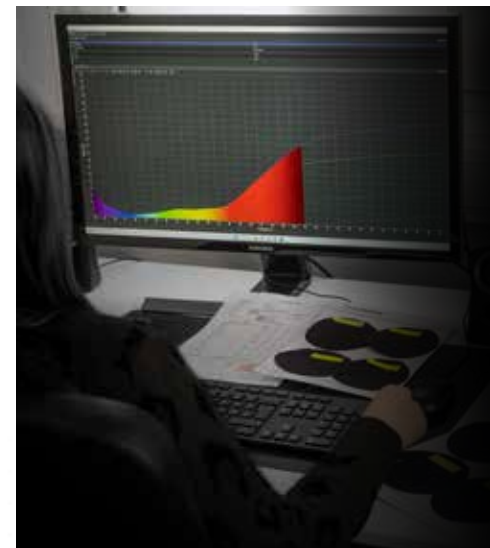

COLOUR INTEGRITY

A critical component of our product development is insuring that colors and shades are not only correct but are also durable for the practical lifetime of the garment. Our in-house quality department verifies colors to recognized international standards using visual and photo spectrometry methods.

NIR (NEAR INFRARED REFLECTANCE)

The measurement and control of near infrared wavelengths provide a level of tactical benefit for both attack and defense during military operations. For many years, the ability to remain undetected in the near infrared spectrum has been a requirement for military clothing and equipment. During times of limited visibility, these wavelengths can be exploited using night vision equipment to detect people or gear. This is especially so when materials and surfaces exhibit values outside the normal spectral signature of vegetation. At CLAWGEAR we have worked closely with all our vendors to insure the materials intended for military and law enforcement meet a recognized standard for spectral reflectance. In addition, all our materials are assessed using our in-house spectrometer.

ADVANCED TEXTILES DESCRIPTION

CLAWGEAR use a number of enabling technologies in the manufacture of our products. To help identify the products that incorporate these technologies, the following icons are used:

ATS FLEX

CLAWGEAR Advanced Textile Solution (ATS) is a lightweight textile with mechanical stretch properties. It is made from CORDURA®'s high-strength T420HT fiber. The textiles in the ATS category have high strength, absorb less moisture, dry faster, are more breathable and lighter than our Classic Line fabrics.

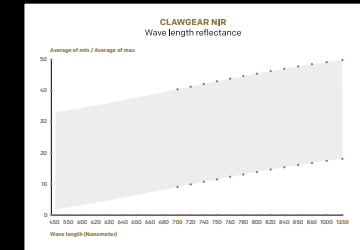

WOOL (MERINO)

We use **Wool (Merino)** as either 100% of the material content or as blends for improved performance. All our wool is sourced from suppliers that follow the Responsible Wool Standard (RWS). This standard protects animal welfare and promotes responsible land management.

NIR

Products with this specific logo have been thoroughly tested and validated to meet military standards for **near infrared reflectance**. By effectively reducing the NIR signature, the overall probability of detection by low-light devices is significantly reduced.

DARKSTONE

Products with the **DARKSTONE** icon have an extremely abrasion-resistant treatment applied to them. The treatment has minimal effect on the textile hand but improves abrasion resistance by a factor of up to thirty depending on the version of the treatment.

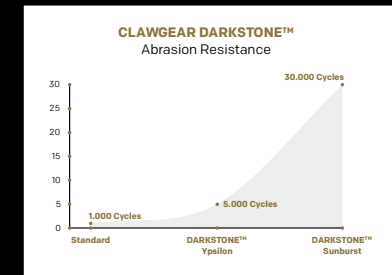

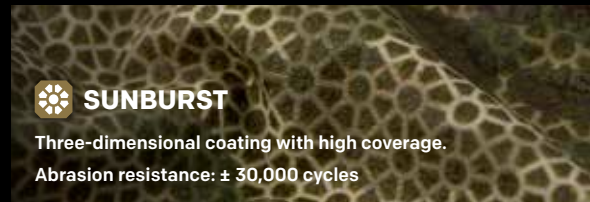

YPSILON

Light ceramics coating with low coverage.
Abrasion resistance: 1,500 – 3,000 cycles

SUNBURST

Three-dimensional coating with high coverage.
Abrasion resistance: ± 30,000 cycles

OPERATOR LINE

MALE FIT

OPERATOR COMBAT SHIRT MK III ATS FLEX

PRODUCT CONCEPT

The **CLAWGEAR Operator Combat Shirt** is a lighter, and faster-drying garment designed for military and law enforcement professionals. It can be worn as a stand-alone item or underneath ballistic protection carriers or stab-resistant vests. The ergonomic design and low-profile seams ensure exceptional next-to-skin comfort and unrestricted movement, while the breathable fabric supports evaporative cooling in high temperatures.

Special attention has been given to color mapping to ensure that camouflage patterns and colors provide maximum coverage. The exposed material is the specialized **CLAWGEAR ATS FLEX** technology that offers mechanical stretch for an extended range of motion.

Both upper arms feature low-profile storage pockets with YKK reverse coil zipper closures. Inside the pockets, becketts allow safe attachment of equipment or storage of first-aid items. The outer upper sleeves include Velcro® loop patches and webbing features for attaching IFF indicators, V-LITE®, or other unit-specific items.

TECHNICAL FEATURES

- Mandarin collar with YKK® reverse coil zipper closure
- Extended camouflage front and rear yoke
- Low-profile upper arm pockets with zipper closure and utility loops
- IFF-compatible Velcro® patch areas on each sleeve
- Ergonomic, pre-curved sleeve construction
- Adjustable cuffs with hook-and-loop fastening
- Double layered elbow area
- Reinforced bar-tacking in critical load-bearing areas

OPERATOR FIELD SHIRT MK III ATS FLEX

PRODUCT CONCEPT

The **CLAWGEAR Operator Field Shirt** is an advanced, tactical garment that takes the design of the original CLAWGEAR field shirt to the next level. It incorporates the knowledge and insights from the original while introducing new technologies for improved performance.

The new design is lighter, dries faster, is more breathable, and offers an extended range of motion thanks to the use of our **CLAWGEAR ATS FLEX** technology. Careful consideration has been given to the color mapping to ensure that camouflage patterns and colors complement each other.

The upper arms feature low-profile storage pockets with YKK reverse coil zipper closures. Inside the pockets, loops are provided for securely attaching equipment or storing first aid items and other essentials.

The outer upper sleeve incorporates VELCRO® loop patches and webbing for attaching IFF indicators, V-Lite®, or other unit items.

TECHNICAL FEATURES

- Mandarin collar with securing tab
- Low-profile upper arm pockets with zipper closure and becket utility loops
- Chest Rig/Plate Carrier accessible chest pockets
- Unique IFF VELCRO® patch on each sleeve
- Ergonomic pre-curved sleeve construction
- Adjustable cuffs with VELCRO® hook and loop fastening
- Critical load-bearing areas bar-tacked
- Ergonomic design
- Center front YKK® zipper closure with kissing welt cover

OPERATOR LINE

MALE FIT

OPERATOR COMBAT PANTS MK III ATS FLEX

PRODUCT CONCEPT

The **CLAWGEAR Operator Combat Pants** are designed for light and fast, short-duration tasks. With a lower-profile design, these pants utilize **CLAWGEAR ATS FLEX** materials, allowing for an unrestricted range of movement. The lighter material reduces water retention and provides faster drying times, while offering enhanced abrasion resistance and durability.

The Operator Combat Pants feature four pockets, with options for attaching personal equipment. The lower leg also provides attachment points for items such as IR beacons or tourniquets, depending on the task or unit procedures. The pants are constructed using twin-needle sewing, with all seams flat-locked for added comfort.

The fit can be fine-tuned with hook-and-loop waist tabs, external leg tabs with hook-and-loop adjustment, and an internal knee locking cord.

TECHNICAL FEATURES

- Rigger/Stable belt-compatible comfort waistband
- Articulated knee area
- Cargo pockets are bellows style with bonded flap closure and sitting position access
- Waist slash pockets feature reinforced edges
- Panel sewing is done with double-needle stitching and flat-locked seams for durability and comfort
- Internal Multi Fit Knee Sleeve

RAIDER FIELD SHIRT MK V ATS FLEX

PRODUCT CONCEPT

The **CLAWGEAR Raider Field Shirt** is a next-generation battle dress field shirt, taking the design and insights from the original CLAWGEAR field shirt and advancing them to a new level. The new design is lighter, faster drying, more breathable, and offers an extended range of movement thanks to the use of our **CLAWGEAR ATS FLEX** technology.

This style is designed for extended deployments and multi-role capabilities. The ergonomic design includes mesh venting in the front pockets and rear darts for improved breathability. A provision for belt-mounted side arms has been included, with zippered access for ease of use. Careful attention has been given to the color mapping to ensure camouflage patterns and colors do not contrast.

On both upper arms, a bellows-style storage pocket is provided with a YKK reverse coil zipper closure. Inside the pocket, becket loops are available for the safe attachment of equipment or the storage of individual first aid items. The outer upper sleeve incorporates bellows pockets, VELCRO® loop patches, and webbing features for attaching IFF indicators, V-Lite®, or other unit items.

TECHNICAL FEATURES

RAIDER PANTS MK V ATS FLEX

PRODUCT CONCEPT

The **CLAWGEAR Raider Pants** are our lightest, most durable pants designed for extended deployment tasks. The ergonomic design and **CLAWGEAR ATS FLEX** materials provide an unrestricted range of movement. The lighter material reduces water retention and offers faster drying times, ensuring optimal performance in various conditions.

The Raider pants feature eight pockets with options for attaching personal equipment. The product is constructed using twin-needle sewing for strength and flat-locked seams for added comfort.

Fit adjustments can be made through hook-and-loop waist tabs, external leg tabs with hook-and-loop adjustment, and an internal knee locking cord.

TECHNICAL FEATURES

- Rigger/Stable belt-compatible comfort waistband

CLAWGEAR RAIDER LINE FEMALE FIT (FF)

Designed specifically for the female form, the RAIDER LINE FEMALE FIT is exactly that. Our RAIDER ATS products re-engineered for the female form. Females currently accounting for upward of 20% of both combined regular force and reserve defence force personnel. Females also currently make upward of 35% of law enforcement officers in a wide variety of law enforcement branches. It made sense for us to recognise this and introduce this product line. The line is based across three styles and uses the same materials and technology used in the established RAIDER line.

BASE LAYER

MERINO SEAMLESS NECK GAITER + BEANIE

PRODUCT CONCEPT

The **CLAWGEAR Merino Seamless Neck Gaiters** are designed to provide lightweight, packable, cold-weather protection. The Neck Gaiter in **STANDARD length** provides neck and lower jaw coverage while the **EXTENDED option** can be worn as a double layer in very cold environments or as a single layer providing coverage to eye level to the front and head crown to the rear.

The **CLAWGEAR Merino Seamless Beanie** is a multi-environment, lighter beanie for four-season use. The construction provides excellent user comfort with a single-thickness, darted head covering with a low-profile double thickness headband.

The stretch properties and lightweight fabric provides limitless wearing options depending on the task, and tactical requirements, and with minimal storage and weight burden.

TECHNICAL FEATURES

- Seamless tube construction with 4-way stretch
- Double thickness tube ends

MERINO SEAMLESS SHIRT SS + LS

PRODUCT CONCEPT

The **CLAWGEAR Merino Seamless Shirt** is designed to be the first line of defense in cold weather and high-output activities. The „long body“ design ensures skin coverage even during a wide range of movement. The blend of durable polyamide and natural wool (Merino) provides both strength and comfort, while the addition of elastane ensures an intimate fit for wicking and breathability.

Available in both long and short sleeve options, the shirt features quick-drying, antimicrobial material that offers a stretch fit for unrestricted movement and comfort.

TECHNICAL FEATURES

- Fabric Composition: Polyamide 56% / Wool (Merino) 42% / Elastane 2%
- Long or short sleeve options
- Crew neck
- Seamless construction with 4-way stretch
- Quick-drying and lightweight
- Mapped knit zones on the chest, underarms, and sleeves

MERINO SEAMLESS BOTTOM + BOXER

PRODUCT CONCEPT

The **CLAWGEAR Merino Seamless Bottoms + Boxers** are performance baselayers for use in cold environments.

The “three-quarter” length bottoms avoid ride-up when worn with longer or four-season socks and boots thereby reducing pressure points from the material gathered.

The boxers are trunk length with mapped zones at the crotch and pouch. The products feature variable knit density and are quicker-drying, and anti-microbial with stretch for an unrestricted range of movement and comfort.

TECHNICAL FEATURES

ACCESSORIES

MUFF

PRODUCT CONCEPT

The **CLAWGEAR Muff** is designed for use in non-tactical, cold-weather environments, whether on land, at sea, or in the air. It can be worn freely or attached to standard MOLLE systems, offering a multi-textile, multi-insulation solution that sets new standards for comfort.

The outer layer is constructed with durable CORDURA® fabric, while the multi-layer insulation combines continuous filament fibers with a soft fleece lining for added comfort.

With several fixing points, the Muff offers flexibility, allowing users to attach it to their personal rig or equipment. It also features a large pocket for storing personal items or, where procedures allow, air-activated heat pads for added warmth and comfort.

TECHNICAL FEATURES

- MOLLE attachment points
- Fleece-lined for warmth and comfort
- Zippered pocket for storage or heating pads
- High-durability outer cuffs with cord lock adjustment
- Inner ribbed „para“ cuffs for easy access and draught exclusion

WOOBIE INSULATED BLANKET (WIB)

PRODUCT CONCEPT

The **CLAWGEAR Woobie Insulated Blanket (WIB)** is a lighter, packable, and faster-drying emergency insulation system that has been a staple of military operations worldwide for decades. The WIB offers both comfort and the potential to be a life-saving tool in critical situations.

Between layers of high-tenacity polyamide ripstop fabric, a thermal insulation layer made from continuous filament hollow-core fibers provides warmth-to-weight performance. All materials are DWR-coated, reducing water absorption and ensuring quick drying. A classic reimagined for modern use.

TECHNICAL FEATURES

- Large, 2 metre x 2 metre coverage
- Paracord anchor points
- Lightweight
- Storage/stuff sack
- Sixteen (16) tie off points
- Quilted design for uniform insulation coverage
- Weight: 1165g/41,09 Oz

OVERWHITE JACKET

PRODUCT CONCEPT

The **CLAWGEAR Overwhite Jacket** is designed to provide visual concealment in alpine and transition terrains. It is worn over primary operational equipment, offering convenient access through pass-through pockets.

Constructed from a lighter yet dense fabric structure that reduces wind permeability and abrasion, the jacket features 70D ripstop material for more durability in tough environments.

This jacket pairs well with the **CLAWGEAR Overwhite Pants**, creating a distinct visual signature for the upper and lower body, which is particularly useful in snowline transitions and mixed alpine terrain.

Please note that this style is oversized.

TECHNICAL FEATURES

- Center front zipper with storm flap
- Two pass-through chest pockets
- Underarm ventilation zips
- Helmet-compatible hood with multi-point adjustment
- Waist drawcord adjustment

MOBILITY SMOCK

PRODUCT CONCEPT

The **CLAWGEAR Mobility Smock** is a modern reinterpretation of the classic combat smock. It departs from the traditional cut and fit by incorporating elements of contemporary technical outerwear, designed to meet the needs of today's warfighters and law enforcement professionals.

The four large-capacity external pockets feature a bellow construction with a "lie-flat" design when not in use. This ensures a clean, low-profile appearance while maintaining ample storage capacity. Additional storage options include two arm-mounted pockets with loop attachment points, two internal mesh pockets, and a large external „poacher's" pocket for enhanced versatility.

The Mobility Smock employs a drop-tail design with a higher cut at the front. The drop-tail construction provides extra lower back coverage when seated, while the higher front cut allows for easier access when entering or exiting vehicles and facilitates mobility for tasks such as climbing ladders.

TECHNICAL FEATURES

- Drop tail construction
- 4 Large capacity storage pockets
- 2 Sleeve mounted organiser pockets
- 2 internal mesh pockets
- 1 external poachers pocket
- Multi adjustable, "Clearview" helmet compatible hood
- Draw cord waist and hem
- Concealed button and double back closure on pockets
- Zipper and concealed button centre front closure

OPERATOR PLATE CARRIER

PRODUCT CONCEPT

The CLAWGEAR Plate Carriers have been designed to allow quicker and easier adaptation for any mission profile thanks to multiple interchangeable parts and accessories. All parts of the 3 plate carriers are interchangeable.

The pre-configured Operator Plate Carrier is assembled with a classic laser-cut front and rear panel which contain the plate bags. The Operator Placard is a classic PALS/MOLLE front panel that allows the mounting of various pouches. The Placard is attached to the plate carrier with commonly known QASM buckles. Once detached, the Placard can be used with our 4 Point Harnesses in the role of a small Chest Rig.

The double-sided 3-inch TEGRIS® Operator cummerbunds are designed to increase user mobility while maintaining stability and stiffness common on larger and heavier cummerbunds. The cummerbunds QR (Quick Release) buckles are detachable to give the user more modularity during re-configuration. The shoulder straps can also be fitted with an optional QR module as shown or a Uni Loop to user preference.

The Plate Carrier's default Platebag is designed to accommodate Medium sized stand-alone ballistic plates. Due to utilizing the latest materials and technology, the plate carrier's design aims for a good balance between durability, comfort and weight.

TECHNICAL FEATURES

- Designed to fit SAPI Small and Medium stand-alone ballistic plates
- Easy and quick interchangeable plate carrier parts
- Double-sided and stiff cummerbunds
- VELCRO® panel for ID patch
- Special CLAWGEAR Uniloop cutouts for cable management
- Multiple and adjustable placard mounting options
- Mission profile adaptive

PROTECTOR PLATE CARRIER

PRODUCT CONCEPT

The pre-configured Protector Plate Carrier set is constructed with an integrated admin pocket on the front panel and a snag-free, low-profile rear panel. The Protector plate carrier utilizes the same Operator placard used on the Operator Plate Carrier set to mount various pouches. The placard can also be adapted to form a chest rig in conjunction with our 4 Point Harnesses.

The low profile Protector elastic cummerbunds are designed to increase the user's mobility and comfort, maintaining minimalistic and low-profile form.

The Plate Carrier's default Platebag is designed to accommodate Medium sized stand-alone ballistic plates. Due to utilizing the latest materials and technology, the plate carrier's design aims for a good balance between durability, comfort and weight.

TECHNICAL FEATURES

- Designed to fit SAPI Small and Medium stand-alone ballistic plates
- Quick and easily interchangeable plate carrier parts
- Low profile stretch elastic cummerbunds
- VELCRO® Surface for ID patch
- Spacious admin pocket
- Special CLAWGEAR Uniloop cutouts for cable management
- Multiple and adjustable placard mounting options
- Mission profile adaptive
- Low profile design

RAIDER PLATE CARRIER

PRODUCT CONCEPT

The pre-configured Raider Plate Carrier is assembled with a hybrid laser-cut front and rear panel that utilizes classic PALS/MOLLE webbing. The front panel has a flat admin pocket for storing commonly used equipment. The RAIDER Placard is a classic webbing PALS/MOLLE front panel that allows mounting various pouches. The Placard is attached to the plate carrier with commonly used QASM buckles. Once detached, the Placard can be used as a chest rig with our 4 Point Harnesses.

The RAIDER cummerbunds provide a large and stable mounting surface while being lightweight due to their hybrid construction. Large cut-outs ensure good breathability and weight reduction. The cummerbunds have a sturdy QR buckle closure. The shoulder straps function alone and can also be adapted to use Quick Release or Uni Loop modules.

The Plate Carrier's default Platebag is designed to accommodate Medium sized stand-alone ballistic plates. Due to utilizing the latest materials and technology, the plate carrier's design aims for a good balance between durability, comfort and weight.

TECHNICAL FEATURES

- Integrated, flat admin pocket
- Designed to fit SAPI Small and Medium stand-alone ballistic plates
- Easy and quick interchangeable plate carrier parts
- 2-sided, breathable, and stable cummerbunds
- VELCRO® Surface for ID patch
- Special CLAWGEAR Uniloops cutouts for cable management
- Multiple and adjustable placard mounting options
- Mission profile adaptive
- Quick Release ready

LOAD BEARING SYSTEM ESSENTIALS 4 POINT HARNESSES & SLEEVES

PRODUCT CONCEPT

01. The primary focus when designing our 4 Point Harnesses is to allow the end user the ability to comfortably distribute the weight of equipment between our belts and shoulder yokes. The minimalist design functions well as a stand-alone product and can also be used while wearing a backpack. The harness geometry, construction, and materials selection prioritize comfort and function. Thanks to our Tegrís angled guides, harness is compatible with Chest Rigs, maintaining lowest possible profile. Harnesses is by default equipped with Chestrig Attachment Accessories. - Weight: 193g

02. A logical development of our padded 4 Point Harness is our 4 Point Harness Light Weight, combining all the features and functions, of our Padded 4 Point Harness in lightweight and durable laminate construction. The harnesses low profile allows it to be worn under a plate carrier, attaching to any of our CLAWGEAR Sleeves, providing enhanced load carriage capabilities whilst maintaining comfortable load distribution across both products. Thanks to our Tegrís angled guides, harness is compatible with Chest Rigs, maintaining lowest possible profile. Harnesses is by default equipped with Chestrig Attachment Accessories. - Weight: 150g

03. The Operator Sleeve is a very minimalist yet highly functional product from the CLAWGEAR design team. It is designed to carry equipment. The construction and use of CORDURA® laminate results in the low profile and low weight of the sleeve. The sleeve size functions in conjunction with a CLAWGEAR belt of the same size. A CLAWGEAR sleeve belt for example would be passed through the length of the sleeve providing a fastening belt within the sleeve. The sleeve has a mounting system for PALS-compatible kits such as pouches and accessories. Additional vertical cuts allow a holster to be mounted through the sleeve and onto a sleeve belt, for example, passed through the sleeve. The inner Velcro hook allows the sleeve to be secured directly to one of our inner belts, thus up to 3 components may be used together. The detachable anti-slip panels can be used to cover the Velcro if no inner belt is used. - Weight: 205g

04. The Raider Sleeve has been designed as a universal belt-based system for carrying equipment. Despite the conventional construction, based on polyamide webbing, it has been integrated with a 500/500D CORDURA® laminate, further enhancing its durability and function. The laser-cut laminate facilitates the use of the CLAWGEAR 4 Point Harnesses to distribute a load between the shoulders and the waist to the user's preference. Much consideration has been invested in ensuring a maximum range of PALS cells across the Sleeve. This combined with foam padding strikes a balance between comfort and versatility.

The Sleeve is profiled in such a way as to harmonize with the anatomy and distribute the weight of the carried equipment in an optimal way. The design allows it to be worn both in combination with an inner belt attached by Velcro or with a sleeve belt over clothing, which will not be damaged thanks to the protective Velcro covers. - Weight: 285g

MAG POUCHES BACKWAD FLAP

PRODUCT CONCEPT

01. The Backward Flap Magazine Pouches are characterized by an unusual approach to the ergonomics of magazine extraction from a secure position in the magazine pouch. The unique design allows magazines to be drawn from both open and closed positions. The elastic shock cord maintains them under compression, holding them securely, and eliminating the possibility of them falling out of the magazine pouch. · Weight: 48g · Fits most 9mm double stack standard-sized magazines

02. Transitioning from a securely closed rifle pouch to an open pouch is fast and intuitive. The open pouch offers absolutely no restriction to drawing the magazine, essential if a rapid reload is required. The end user can also adjust the shock cord with a cord lock to personalize the tension it requires to open the magazine pouch. · Weight: 93g · AR15 STANAG Compatible · AR15 PMAG Compatible · Steyr AUG Compatible

03. The Backward Flap SR Magazine Pouch offers the unique opening properties of the new magazine pouches for larger magazine formats in the 7.62 x 51mm NATO range. · Weight: 100g · AR10/SR25 Compatible

BELTS - ESSENTIALS INNER, OUTER, & SLEEVE BELTS

PRODUCT CONCEPT

01. Designed to function both independently and additionally to stabilize the Outer Belts during use, the central core is reinforced with Tegriss composite. This makes the belt lightweight but stiff enough to wear a pistol holster on it. A simple Uniloop for fastening ensures countless variations of size for ultimate comfort. · Weight: 118g

02. A lightweight and even further simplified version of our Inner Belt offering end users another option to fulfill their varied tasks. The low profile and simple construction result in an easy-to-use comfortable belt. · Weight: 94g

03. By combining both an innovative construction technique and state-of-the-art materials, the Operator Outer Belt benefits from reduced weight and substantial stiffness. The stiffness contributes to its ability to carry various items of kit about its circumference using a PALS-compatible system. The belt is secured with a 25mm AUSTRALPIN COBRA® Buckle providing all the functionality and durability Cobra buckles are renowned for with little to no gain in weight. · Weight: 174g

04. The lightweight version of our Operator Outer Belt offers our customers another option to experience one of our belts. The lightweight belt offers all the durability and functionality of the standard Operator Outer Belt in the same format with the addition of a top-quality polymer buckle. The double lock buckle in 38mm width is color-coded, NIR-treated, and secure. · Weight: 139g

05. The Raider Outer Belt is designed with classic PALS webbing attachment in mind. The combination of modern materials including a composite Tegriss core provides substantial stiffness to the belt. Fastening with the latest 38mm AUSTRALPIN COBRA® Snakebite buckle makes size adjustment simple and convenient. · Weight: 198g

06. The Raider Outer Belt Light Weight combines all the fantastic design features and functionality of the Raider Outer Belt in a lightweight format. Including the same PALS attachment points and stiffness due to the reinforced Tegriss core · Weight: 151g

07. Specifically designed to fit through the new CLAWGEAR sleeves, the Sleeve Belt consists of carefully considered layers of webbing, providing good rigidity as a stand-alone belt or when used as planned with a sleeve. The center front webbing is cleverly tapered to assist in fitting the belt through the various loops contained within the sleeve. · Weight: 209g

08. Supporting the CLAWGEAR Sleeve Belt is the second version in this line, the Sleeve Belt Light Weight. 38g lighter than the original due to the use of a military-grade plastic buckle the Sleeve Belt LW maintains all the same functionality. · Weight: 171g

GOVERNMENT PROJECTS

For many years CLAWGEAR has supported a number of special project developments. We have worked in conjunction with numerous agencies both nationally and internationally. These projects are supported by CLAWGEAR's dedicated team within the product development department.

Our Application Engineers work closely to facilitate client concepts developing into highly functional customer products which meet recognized quality standards. The driving goal at CLAWGEAR is to solve client problems both individual and organizational through the development of innovative solutions.

For further information please contact CLAWGEAR using the contact details provided:
info@clawgear.com

COMBAT HARNESS

Developed in 2021 to fulfill the requirements of the European special forces units as specified in a tender. Started as a pure idea to combine tactical belt with climbing abilities without losing any tactical features. The main goals were:

1. Safety (EN standards compliance)
2. Easy transformation from belt to harness
3. Tactical performance not compromised

Standards EN12277 TypC & EN354 & EN362

Material composition:
Cordura 500D/Polyamide/Dyneema Threads

SHOTGUN AMMO BAG

Developed in 2019 to meet the operational demands of law enforcement. Created to meet the unit's demand to have a high capacity, dualcompartment bag for the shotgun ammo.

Designed to be fixed either on the tactical belt, or vest. Elastic cords with hooks allow user to counter it's weight and stabilize it. QR buckle and panels allow easy bag disposal within the team members. Wide opening provides unrestricted access to the bag's content.

Material Composition: Cordura 500D/Polyamide

TITAN 130L SNIPER BACKPACK

Developed in 2020 to fulfill the requirements of the European special forces units as specified in a tender.

Modern approach to a SOF 130Ltr sniper backpack. Multiple weapon carrying options (for both sniper and assault rifle). Load capacity divided into several compartments with multiple access points.

Material composition: Cordura 500D/Polyamide/Carbon Fiber

CLAWGEAR GHILLIE SUIT – REDEFINING MODULAR VERSATILITY

The CLAWGEAR Ghillie Suit sets a new standard in adaptability and versatility. Designed for demanding missions, it features a smart modular system that can be perfectly tailored to individual needs and operational requirements.

Equipped with specialized IRR camouflage threads (Infrared Reduction), the suit is available in Multicam and Alpine variants. This ensures optimal camouflage for various environments and climatic conditions, providing effective concealment in any terrain.

In addition, the Ghillie Suit can be expanded and customized with adaptable components. Whether you need enhanced camouflage, improved mobility, or optimized protection, the Ghillie Suit gives you the flexibility to tailor your gear to your exact requirements.

The CLAWGEAR Ghillie Suit – for maximum efficiency, camouflage, and comfort in every situation.

FLIP-UP SIGHTS

Developed in 2018 on behalf of a leading firearms manufacturer for a government project. Since then, it has been in official use and continuously improved to meet specific tender requirements.

- Robust metal construction
- STANAG 4694 compatible
- Tool-free adjustment
- Special versions available (e.g., with tritium inserts)

RIFLE SLINGS

Developed in 2024 on behalf of a leading firearms manufacturer. Specifically designed for military operations with strict requirements for color and IR signature to reduce visibility under night vision systems.

- Development according to specific customer requirements
- High-quality materials & durable construction
- F9 properties (IR signature)

RIFLE SLING HOOKS

In use in the OEM sector since 2023 and developed according to customer specifications. Our OEM rifle sling hook is meticulously crafted from premium materials, ensuring exceptional quality, durability, and reliability for all your firearm needs, as well as optimized manufacturing for maximum cost efficiency.

- Precise manufacturing according to OEM specifications
- High-quality materials & durable design
- Efficient & cost-optimized production

MEASURING INSTRUCTIONS

HOW TO MEASURE CORRECTLY

Take care to make all your measurements close-fitting. Dimensions are in cm, length of the pants is also in inches. The figures show your own body measurements. For the most recent version of our size chart, please check our website. Please use a tape measure for taking the measurements.

A CHEST GIRTH

This is the horizontal girth of the torso, measured at the axilla. The person should stand upright when measuring, with arms hanging freely downward. (See Fig. 01)

B OUTER ARM LENGTH

This is the distance from the shoulder point to the wrist point. The shoulder point is the most lateral point of the lateral edge of the spine of the scapula, projected vertically to the surface of the skin. The wrist point is the more prominent point of the bulge of the head of ulna (prominent bone at the little finger on the side of the wrist). The person should stand upright when measuring, with arms slightly angled. (See Fig. 01)

C WAIST GIRTH

This is the horizontal girth of the body measured at the waist level. The waist level is midway between the lowest rib point and the highest point of the hip bone at the side of the body. The person should stand straight upright with the abdomen relaxed. (See Fig. 01)

D INSIDE LEG LENGTH

This is the vertical distance from the inside leg level (crotch) to the ground. The person stands with legs shoulder width apart. The measurement is taken from the rear of the body. (See Fig. 01)

E HEAD GIRTH

This is the maximum, horizontal girth of the head measured above the centre point of the bow ridge and crossing the rearmost point of the head. The hair should be included in the measurement. (See Fig. 01)

F HIP GIRTH

This is the horizontal girth of the body measured at the hip level. The hip level is the greatest projection at the back of the body (buttocks). The person stands straight upward with the feet together and the abdomen relaxed. (See Fig. 01)

G FOOT LENGTH

Measure the distance from rear end of the heel to the tip of the longest (first or second) toe. It should be parallel to the longitudinal axis of the foot. The person stands straight upward with the legs shoulderwide apart, weight equally distributed onto both feet. (See Fig. 03)

MEASURING INSTRUCTIONS

HOW TO MEASURE CORRECTLY

Take care to make all your measurements close-fitting. Dimensions are in cm, length of the pants is also in inches. The figures show your own body measurements. For the most recent version of our size chart, please check our website. Please use a tape measure for taking the measurements.

A BUST GIRTH

This is the horizontal girth measured at bust point level. The bust point is the most anterior point of the bust when wearing a bra. The person stands straight upward with arms hanging freely downward. (See Fig. 01)

B OUTER ARM LENGTH

This is the distance from the shoulder point to the wrist point. The shoulder point is the most lateral point of the lateral edge of the spine of the scapula, projected vertically to the surface of the skin. The wrist point is the more prominent point of the bulge of the head of ulna (prominent bone at the little finger on the side of the wrist). The person should stand upright when measuring, with arms slightly angled. (See Fig. 01)

C WAIST GIRTH

This is the horizontal girth of the body measured at the waist level. The waist level is midway between the lowest rib point and the highest point of the hip bone at the side of the body. The person should stand straight upright with the abdomen relaxed. (See Fig. 01)

D INSIDE LEG LENGTH

This is the vertical distance from the inside leg level (crotch) to the ground. The person stands with legs shoulder width apart. The measurement is taken from the rear of the body. (See Fig. 01)

E HEAD GIRTH

This is the maximum, horizontal girth of the head measured above the centre point of the bow ridge and crossing the rearmost point of the head. The hair should be included in the measurement. (See Fig. 01)

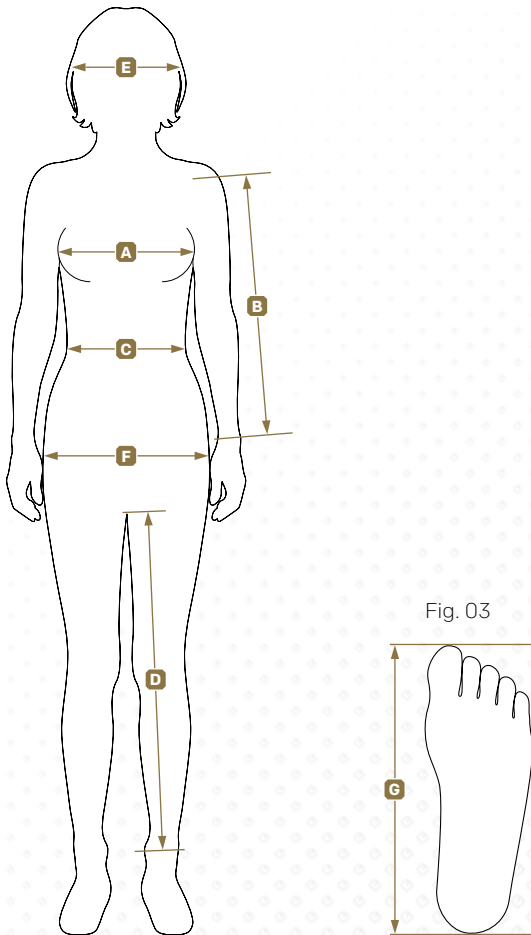

F HIP GIRTH

This is the horizontal girth of the body measured at the hip level. The hip level is the greatest projection at the back of the body (buttocks). The person stands straight upward with the feet together and the abdomen relaxed. (See Fig. 01)

G FOOT LENGTH

Measure the distance from rear end of the heel to the tip of the longest (first or second) toe. It should be parallel to the longitudinal axis of the foot. The person stands straight upward with the legs shoulderwide apart, weight equally distributed onto both feet. (See Fig. 03)

CUSTOMER BENEFITS

OUR PROMISE FOR AN EXCEPTIONAL SHOPPING EXPERIENCE

01 Free shipping and high availability

- Through reliable express shipping service with free rates, depending on order value and country location. Discover hundreds of high-quality products readily available in the CLAWGEAR webshop.

02 Responsive Customer Support

- Priority to quick and efficient responses to technical or logistical issues, minimizing downtime and troubling for your business.

03 Customized and fast Quotation

- Adaptive solutions to match exactly what your business need. A fast and customized quotation is key for your customer decision.

04 Tailored Marketing & Sales tools

- Close cooperation between our marketing and your business.
- Easy access to image and text material.
- Sales tools to ensure your business performance

05 Dedicated Account Management

- Immediate access to an expert who can support the purchasing process, offer personalized suggestions, and solve problems best way possible.

06 Reporting Tools

- To ensure you are able to make make data-driven decisions and manage your budget more effectively, we provide you with easy access to your purchase's info and consumption patterns.

07 ERP Integration

- TMH provides tools to integrate automatically ERP data, improving efficiency and minimizing the need for manual data entry.

08 Order Fulfilment and Logistics Support

- Priority to speed, accuracy, and reliability of your order delivery. Your peace of mind that your orders will arrive on time and in full is our moto.

09 Security and Data Privacy Compliance

- Priority to your data protection, for both, B2B and B2G entities.

DEALER REQUEST

APPLICATION PROCESS

Selected retailers profit from attractive wholesale conditions. To start the process of becoming a registered dealer with us, please complete our online dealer application form at: **clawgear.com** Describe your business activity in detail as this is an important decision criterion for setting up an account.

A wholesale account is only available for retailers with appropriate infrastructure (brick-and-mortar shop or well-organized webshop) and authorization by the local authorities. Business activity has to be pursued full-time, and the product line must contain quality goods that are largely available from stock. We do not sell to any dealers conducting business out of their residences. Associations, martial arts schools and gyms, security companies, event and course organizers, drop shipment businesses, surplus dealers and other unrelated industries don't qualify for a wholesale account. Authorized retailers must be able to maintain competent advice to customers and aftersales services including technical first-level support.

You can apply for your dealer account in just a few steps:

- 01** Visit our website. **CLAWGEAR.COM**

- 02** Click the „DEALER AREA“ button on the right side of the navigation bar.
 
- 03** Fill out the „DEALER APPLICATION FORM“ online.
 
- 04** Get a response as soon as possible.
