

## SHOCKWAVE PISTOL SUPPRESSOR 9MM

The CLAWGEAR Arms Shockwave Pistol Suppressor 9MM has been specifically developed for use with semi-automatic pistols chambered in 9x19 and is aimed at professional users such as military and police special forces. The Shockwave Suppressor impresses with its high level of safety and reliability, combined with top performance and user-friendliness. Manufactured in Austria, the suppressor offers long durability and high sound suppression performance—even under extreme conditions—thanks to a robust combination of steel and aluminum.

## SHOCKWAVE PISTOL SUPPRESSOR 9MM

 **CLAWGEAR**  
ARMS

### FEATURES AND ADVANTAGES

- **Tool-free dismantling:** The Shockwave Pistol Suppressor can be completely disassembled without tools, allowing for easy cleaning and maintenance. To ensure the suppressor's safety when repeatedly disassembling and reassembling, the end cap has been equipped with a durable and temperature-resistant thread locker. The ability to disassemble the suppressor without tools significantly contributes to the product's longevity.
- **Safety-oriented design:** The Shockwave Suppressor features two independent housings—an inner housing formed by the baffles and an outer housing made of high-strength aluminum. The first baffle directly after the muzzle, also known as the blast baffle, is made of stainless steel, providing maximum durability and safety, while the remaining baffles are made from lightweight 7075 T6 aerospace aluminum.
- **Booster/Nielsen Device:** The Nielsen device ensures smooth cycling of the pistol despite the additional weight of the suppressor on the barrel, ensuring reliable operation with various ammunition types, particularly subsonic ammunition.
- **Adjustable point of impact:** If there is a shift in the point of impact due to the mounted suppressor, it can be adjusted while mounted and without tools, allowing shooters to optimally align their pistol's point of impact.

### TECHNICAL DATA

- Service life: at least 5000 shots
- Sound suppression: ~30 dB (depending on ammunition)
- Function: Calibrated for Glock Model 17, 19, and 45.
- Connection thread: M13.5x1 CCW or 1/2" -28 UNEF
- Diameter: 37 mm.
- Total length: 200 mm.
- Extension of the weapon system: 192 mm.
- Weight: 340 g.

### PRICE

Produktname	B2C including VAT
Shockwave Pistol Suppressor 9MM	456,00 €

### PARTS

- 01 - Endcap
- 02 - Aluminium Baffle
- 03 - Stainless Steel Blast Baffle
- 04 - Piston (Disassembly Tool)
- 05 - Spring
